

## EXPERTISE AND RESUME OF PAST PROJECTS

As an Owner's Representative, Raynard O. Kearbey has completed a wide range of project types either as a Senior Project Architect, Director of System Facilities or Associate Vice Chancellor of System Facilities over a 12-year span. The building types include a major expansion and renovation of a student union, University Research buildings, a new 31,000 seat football stadium, general academic buildings and a 950-vehicle parking garage with parking administration offices.

All of the major projects shown below and completed in the past 10 years were highly sustainable and were validated as such by achieving LEED Gold or Platinum.

### **The University of North Texas System. Dallas, Texas**
